

To Whom It May Concern:

I have been using the services at JL Anderson Heating & Cooling for several years, not only in my Business but in my home as well. During the installation of a Clean Effects in my home, every member of Anderson Heating & Cooling presented themselves in a very professional and Courteous manor. The craftsmanship of the installation and the quality of the materials used is very impressive and was above our expectations. Our new Trane Clean Effects has more than paid for itself just in the difference it has made in my daughters allergies. It's my opinion a Clean Effects should be installed on every installation.

When it came time for me to remodel my business office, Anderson Heating & Cooling addressed many comfort concerns that my staff and I had. By doing a building analysis and load calculation they discovered that my existing cooling system was too small. After installing a properly designed heating and cooling system, including a Clean Effects, my staff is happy with the comfort and I am extremely happy with the utility savings.

I will recommend Anderson Heating & Cooling to anyone who has a heating and/or cooling need.

Regards,

Tom Day
